

Questions and Notes

Victor & Mikkel

October 24, 2020

1 Questions

- train_data_checkpoint.json: Trained on wikipedia and articles for what purpose? To understand "security", "privacy", etc.? When is this used?

2 Notes

- Reddit API: client ID: fQuRCESlv_7yOQ client secret: v6AjzytAKDgqjqyQNczapezXUjk

3 Overview

- reddit_API.py: Uses the Reddit API to gather top tweets from the "smarthome" subreddit and comments. Now set up to use Victor's account. *Questions:* Why does it not save them? How many tweets can/should we get?
